| <b>Natural Language Query and Agent Development</b><br>1. Started development of the natural-language analytics workflow for DataPilot AI.<br>2. Designed the Planner Agent to convert a user's analytical question into a structured execution plan before SQL generation.<br>3. Designed the Executor Agent workflow for generating SQL from the execution plan and discovered database schema.<br>4. Implemented the initial query execution flow and structured result handling for analytical queries.<br>5. Planned the Analyzer Agent stage for explaining query results in natural language and prepared the next phase for automatic visualization and recommendations. |                                     |
| .....<br><b>(Internal Guide)</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | .....<br><b>(HOD, Dept. of MCA)</b> |

**Vision :** To transform young graduates into skilled computer professionals to meet industrial and societal needs.

**Mission:** To enhance the Teaching learning process to meet quality education in the field of computer applications.  
To impart the knowledge in current technologies to meet the industrial needs.  
To inculcate ethical values and leadership qualities for the betterment of society.
